Dr. Jessica Drummond, DCN, CNS, PT, NBC-HWC

How to Organize Your Meal Prep and What to Cook to Stay Healthy during The COVID-19 Pandemic

- Being calm is key to keeping the immune system healthy.
- For those with increased inflammation and autoimmune challenges, staying low carb is key.
- Eating under stress and with limited trips out, makes this a challenge.
- Let's make it easier today...

Staying Calm

- You probably won't do this perfectly.
- You might eat a cookie sometimes.
- You might run out of cauliflower rice and just eat rice.
- All of that is OK.
- You are resilient.
- You don't need to be perfect.

Staying Calm

- Focus on ADDING nourishment to your digestive, nervous, and immune systems.
- Do a lot of other things to keep your systems healthy.
- Meditation.
- Prayer.
- Nature walks (far from others.)
- Plant a garden.
- Exercise outside.
- Sleep.
- Nourish and protect with supplements.
- Physically isolate and socially connect.

Shop...

- Thinking in batches that can be shared if you're home with a crowd, and/or split/ frozen if you're home alone or with just a few.
- Making soup/ stew/ chili, muffins, roasted and sautéed veggies, protein + veggies, smoothies.
